

# Exploring the human musical experience in the age of Big Data and Technology

Dr. Vinoo Alluri  
Assistant Professor  
Cognitive Science Lab

# MUSIC COGNITION GROUP

**Research Focus:** The Music Cognition Group is an interdisciplinary group focused on researching music and its multifaceted forms and representations. This includes the related fields of music cognition, music information retrieval, neuroscience, natural language processing, music generation, among others.

## Movement

- identify universal grammar in music-induced movement
- predicting interaction from dancing dyads
- predicting individual traits from music-induced movement

## Social Media

- analysing online discourse on musical experiences and associations
- online music sharing vs private streaming
- music sharing during social movements

## Lyrics

- emotion prediction and topic modelling from lyrics using NLP
- lyrical structural analyses
- associating lyrical preferences with individual differences

## Soundtrack Generation for Books

- automatic retrieval of soundtracks for books with movie adaptations
- automatic generation of soundtracks for books

## Health and Well-being

- predicting risk for depression via music listening habits via digital traces in online music listening platforms
- autism and music preferences

## Perception

- cross-cultural studies on music perception and related emotions
- role of music as a social surrogate
- musical aptitude: testing different demographics

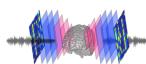

## Neuroscience

- analysing individual differences that modulate brain responses to music
- decoding brain states using functional MRI
- multimodal fusion of structural and functional MRI

## Representation

- analysing music representations generated via deep learning
- analysing multimodal representations of music & lyrics

## Publications

RIP 90's, 20 years later and still the best music generation.  
Reply • 4    1 like    1 dislike

r/Music · 2 years ago

Who still listen to albums in 2021? I am currently on a mission to go through the best albums in music history. Its something i can recommend. Listening to a complete album is a great feeling.

God is up to something.  
God is up to something.  
  
God is up to something.  
God is up to something,  
So get ready,  
Get ready for your miracle.  
  
God is up to something.  
God is up to something.  
  
God is up to something.  
God is up to something,  
Get ready, get ready for your miracle.  
  
Eyes have not seen, ears have not heard  
All of the wonderful things that God has in store,  
So get ready, get ready for your miracle.  
  
It's on the way,  
It's on the way,  
It's on the way,  
It's on the way.  
  
It's on the way,  
It's on the way,  
It's on the way...  
  
Your miracle is on the way.

# Characterising Big Music Data: Artist

**Dua Lipa** (/duəˈlɪpə/ (listen) *DOO-a LEE-pə*, Albanian: [duaˈlipa]; born 22 August 1995) is an English and Albanian<sup>[3][1]</sup> singer and songwriter. Her mezzo-soprano vocal range and disco-influenced production have received critical acclaim and media coverage. She has received numerous accolades throughout her career, including six *Brit Awards*, three *Grammy Awards*, two *MTV Europe Music Awards*, an *MTV Video Music Award*, two *Billboard Music Awards*, an *American Music Award*, and two *Guinness World Records*. She was included on the *Time 100 Next* list in 2021.

After working as a model, Lipa signed a recording contract with *Warner Bros. Records* in 2014. She rose to prominence with her 2017 self-titled debut album, which peaked at number three on the *UK Albums Chart* and spawned the successful singles "Be the One", "IDGAF", and the UK number-one single "New Rules". Lipa was honoured with the *Brit Awards* for British Female Solo Artist and British Breakthrough Act. Her second chart-topping single, "One Kiss" with Calvin Harris, was the longest-running number-one single by a female artist in 2018 and won the *Brit Award* for Song of the Year. In 2019, Lipa won the *Grammy Award* for Best New Artist, as well as the *Grammy Award for Best Dance/Electronic Recording* for "Electricity", her collaborative single with Silk City.

Lipa's second album, *Future Nostalgia* (2020), was met with critical acclaim and became her first UK number-one album. Its lead single, "Don't Start Now", was the year's most commercially successful song by a female artist in the US; ranking in the top-ten of the *Billboard Hot 100* year-end chart. Its follow-up singles, "Physical", "Break My Heart", and "Levitating", were also commercially successful; with the latter song topping the Hot 100's year-end chart in 2021. *Future Nostalgia* received the *Brit Award for British Album of the Year* and the *Grammy Award for Best Pop Vocal Album*. Both of Lipa's albums are the most-streamed female albums on *Spotify*, with over 10 billion streams each.

## Early life

Dua Lipa was born in London,<sup>[4]</sup> the eldest child of Kosovo Albanian parents, Gjergj and Dukagjin Lipa from Pristina, FR Yugoslavia (present-day Kosovo).<sup>[5][6]</sup> Her father is of Albanian descent through his mother, and through her maternal grandmother, she is of Bosniak descent.<sup>[8][9][10]</sup>

Her ancestry can also be traced back to the city of Peja, Kosovo. Both of her grandparents are from Peja. She has a sister named Rina and a brother named Gjin.<sup>[7][12][13]</sup> Lipa was inspired to sing by her father,<sup>[14][15][16]</sup> who was the lead singer and guitarist of the Kosovan rock band, "The Rockers".<sup>[7][12][13]</sup> Her father continued to play music at home, including his own compositions and songs of Bob Dylan, Radiohead, Sting, the Police and Stereophonics.<sup>[15][16][19]</sup> Lipa started singing at the age of five.<sup>[20]</sup>

Dua Lipa

2 Need some relaxation music

Please help. I am horrible at remember bands or even having a decent playlist. I am feeling depressed tonight and need something to ease my mind so I can get some sleep. I don't want any inspirational music, just some calm relaxing music. I would really appreciate it -

I tried to keep with instrumental, as it makes it easier to just listen on repeat without paying attention. I hope these help.

## Music Sharing in times of distress

# Music Sharing

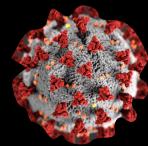

Desur, P., Kamble, T., Krause, A., Kumaraguru, P., Alluri, V. (2022) "The Times They Are-a-Changin": The Effect of the Covid-19 Pandemic on Online Music Sharing in India. In the 13th International Conference on Social Informatics. Preprint: [https://lnkd.in/dBi3a\\_5u](https://lnkd.in/dBi3a_5u)

# Music Sharing

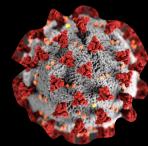

Data Group	Tweets with Spotify URL	Tweets with English Songs	Songs with correct English Lyrics
Wave-1 (July-November 2020)	808	416	323
Control-1 (July-November 2019)	607	271	204
Wave 2 (April-June 2021)	556	317	263
Control-2 (April-June 2019)	351	177	155

# Music Sharing

- music as a social surrogate: community focused function rather than tending to a more self-serving utility
- acoustic features - music shared had lower valence and high energy in wave-1

# Music Sharing

- lyrical themes

<b>Wave-1 (vs. Control-1)</b>	Exclusion* ↑, <i>Satisfaction</i> ↑, <i>Hardship</i> ↑, <i>Motion</i> ↑
<b>Wave=2 (vs. Control-2)</b>	Communication ↑, <i>Satisfaction*</i> ↓
<b>Wave-1 + Wave-2 (vs. Control-1 + Control-2)</b>	<i>Hardship</i> ↑, <i>Exclusion</i> ↑, <i>Motion</i> ↓

# Music Sharing

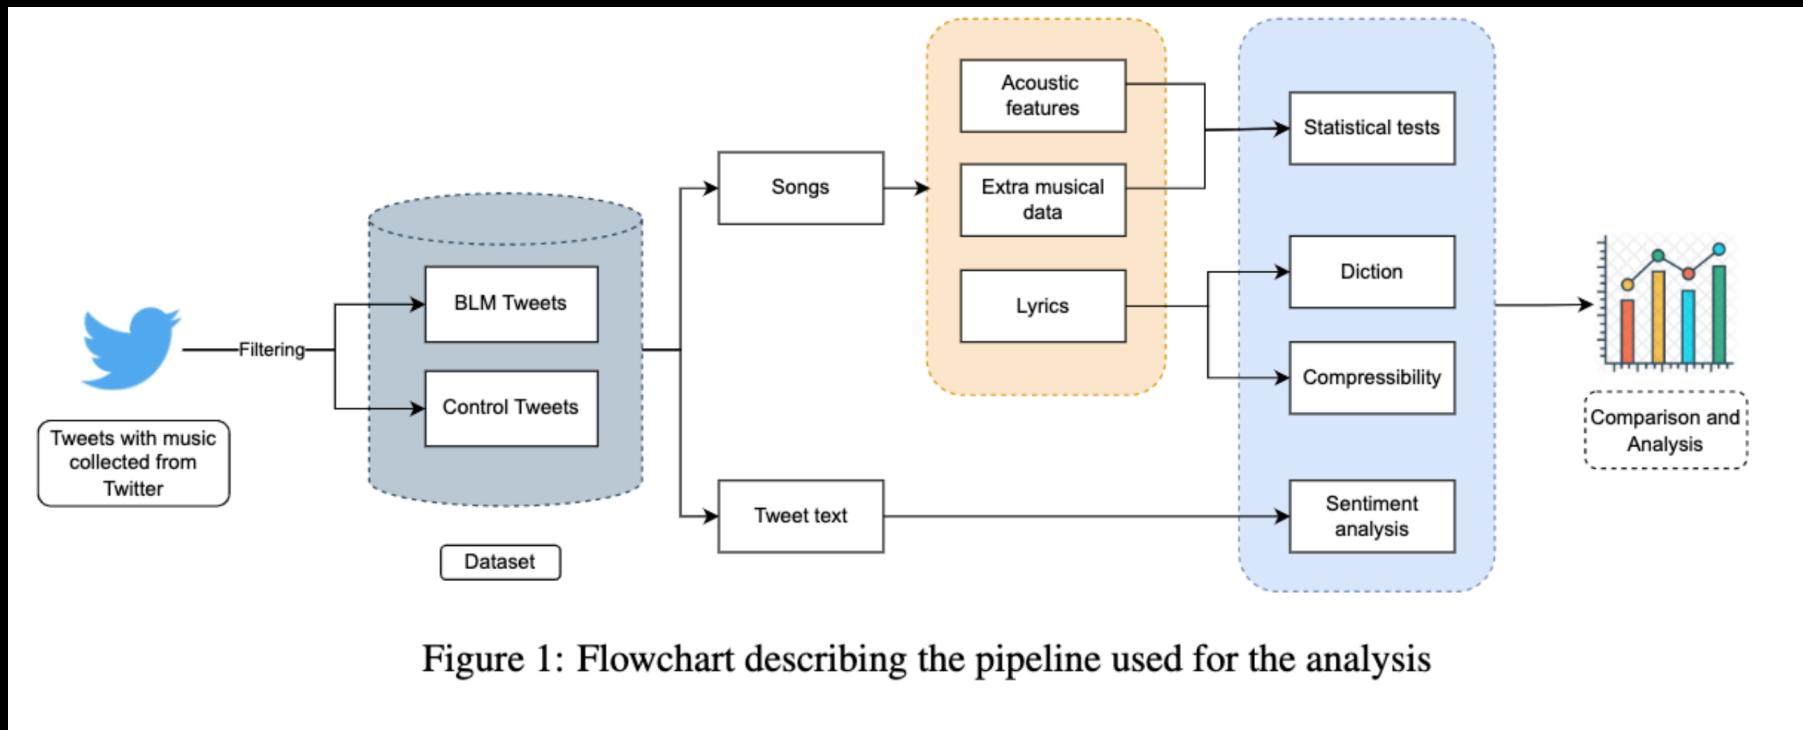

Figure 1: Flowchart describing the pipeline used for the analysis

# Music Sharing

Metric	Control	BLM
Number of tweets	14,672	12,661
Total songs (w playlists)	19,613	11,131
Single tracks	1,726	4502
Tracks with lyrics	1,398	3,727

Table 1: Dataset Statistics

# Music Sharing

- within 6 months - more than ten thousand tweets along with music had been shared
- artists of the 1960s who wrote protest music most popular
- protest music characterised by high *valence, danceability, instrumentalness, and speechiness*

# Music Sharing

- lyrics for the songs shared in context of BLM have *less repetition (low compressibility)*
- lyrical themes:
  - high *Aggression, Hardship, Cooperation* and *Accomplishment*
  - low *Satisfaction, Optimism, Self-reference*

# Big Data: The Good

- fantastic opportunities to generate knowledge and technology
- anonymity
  - “safety net” to share music and musical experiences
  - discourse on music related to specific conditions/topics (depression, autism, ADHD, earworms, music for concentration, etc...)
- naturalistic responses

# Big Data: The Good

- streaming platforms
  - psychological insights
  - cultural and social influences
  - music trends
  - market research and recommendations
  - personalised music therapy

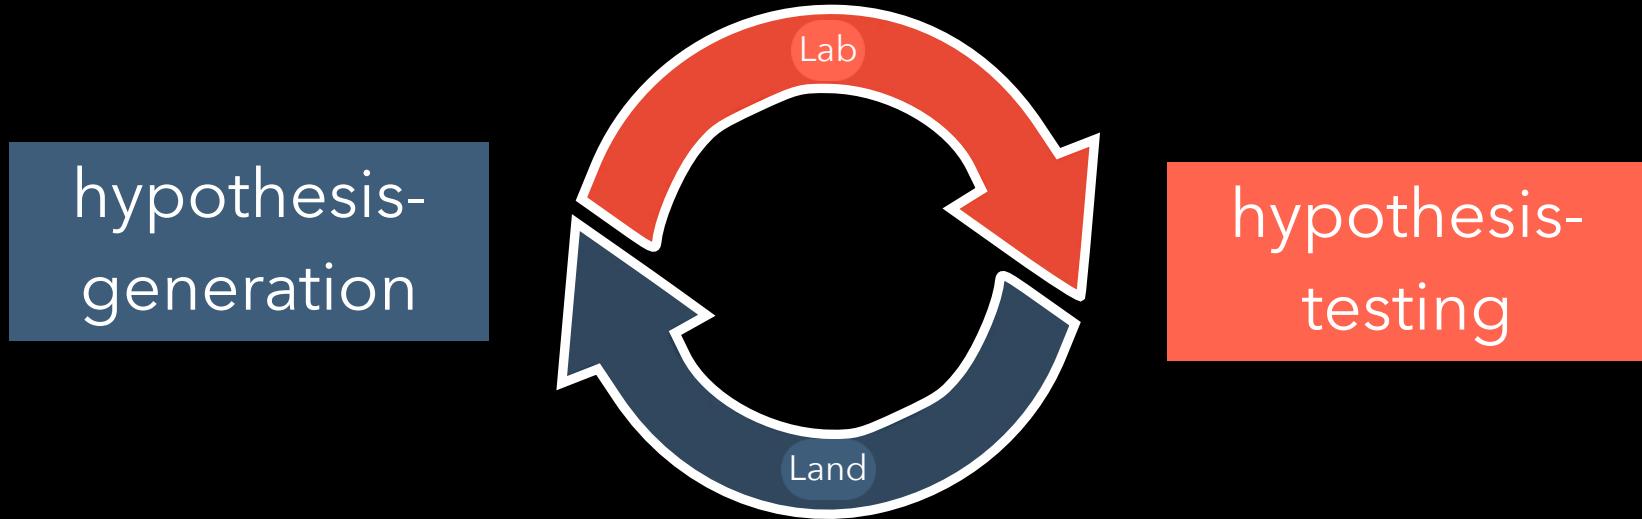

# Big Data: The Bad & The Ugly

- **is Big(ger) always better?**

- **Value & Veracity?**

- noise
- language model errors
- solution-> mixed-methods
- platform-specific bias (ex: social desirability, english-speaking population)
  - solution-> rephrase and situate questions accordingly
- access?
